EDUCATION

St. Joseph's Institute of Technology

Bachelor of Engineering in Computer Science **CGPA:7.8**

Chennai, TamilNadu

Aug. 2022 – May 2026

EXPERIENCE

ROOTECSTAK

CyberSecurity Intern

June 2024 - July 2024

Chennai

- Gained hands-on experience with OWASP Top 10 vulnerabilities, focusing on web application security.
- Solved practical exercises on TryHackMe and PortSwigger to enhance vulnerability identification and mitigation skills.

K Labs Technology

Software Developer Intern

March 2025 - Present

Chennai

- Developed proficiency in Node.js, React, and SQL through hands-on development of enterprise applications, implementing best practices for scalability and performance.
- Successfully delivered multiple production-ready solutions in live project environments, collaborating with cross-functional teams to meet client requirements and business objectives.

PROJECTS

AI-DRIVEN PLANT DISEASE PREDICTION | Python, React, Flask

MARCH 2025

- CNN-Based Crop Health Monitoring: AgriMind employs CNNs to analyze crop images for real-time health assessments.
- Data-Driven Farming: The platform enables farmers to make informed decisions for sustainable agriculture.

PDF Summarizer, Key Elements Extractor & Chatbot | Python, Cohere AI

Jan 2025

- Built a Dash web application enabling users to upload PDF files for AI-powered summarization, information extraction, and Q&A.
- Implemented PDF text extraction to convert uploaded documents into readable text format.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, FastAPI

Developer Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib

CERTIFICATIONS

Introduction to Cybersecurity (Cisco)

Ethical Hacking Essentials (EC-Council)

Linux For Beginners (Infosys Springboard)

Introduction to MongoDB for students

ACHIEVEMENTS

H7Ctf (International CTF) - Top 50 out of 300 teams

- Achieved a Top 50 rank in the H7Ctf International Capture The Flag (CTF) competition, competing against 300 teams worldwide. Demonstrated expertise in cybersecurity domains like cryptography, web exploitation, and reverse engineering, showcasing advanced problem-solving skills and teamwork on an international stage.

Capture The Flag (SRM Valliammai) - Top 15

- Secured a Top 15 position in the Capture The Flag (CTF) competition at SRM Valliammai Engineering College by solving challenges in cryptography, web exploitation, and network security. Showcased strong problem-solving skills and cybersecurity expertise under time constraints.
